AI/PVS-7D

The PVS-7D night vision goggle is the current military issue night vision goggle for the US armed forces. It is also the preferred choice of many foreign (NATO) forces. The AI/PVS-7D is our "Government Sales" version of the PVS-7D line. Built to withstand the rigors of battlefield use the AI/PVS-7D was designed to withstand water immersion, be hands free, utilize quick connect and disconnect features, and includes an infrared LED for use in complete darkness and assist in reading maps. An LED warning light is also built into the unit to remind the user that the infrared LED can be seen by others who are using night vision devices. A low battery warning light is built into the unit and there is a high light cutoff which will turn the unit off if it is left on during daylight conditions. The AI/PVS-7D runs on two AA batteries which power the unit for more than 40 hours.

Ask for the "Deployment Ready" package by specifying "DR" in your requirement and you'll receive everything needed for immediate deployment.

The AI/PVS-7D is for sale only to government agencies and verified government contractors.
