## COMPASS ASSY—A3187430

The ITT A3187430 compass is probably one of the most useful accessories available for night vision goggles such as (but not limited to) the PVS-14, PVS-7D, and PVS-23. Rather than fumbling with a compass and attempting to read it through the night vision or being forced to use a visible light with potentially disastrous results, the A3187440 compass assembly enables to user to get a bearing through their night vision. For ease of use and increased safety/security, this is a must have accessory for night vision.

### Features:

- Slides over the objective lens of your PVS-14, PVS-7D, or PVS-23
- Gives an instant reading.
- Rugged and water resistant.
